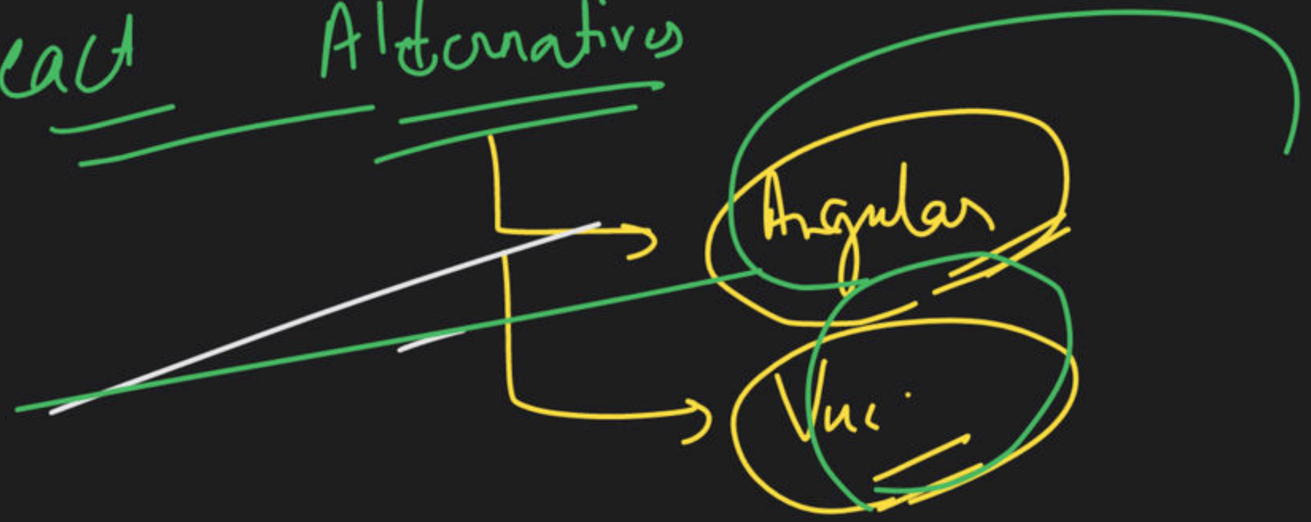
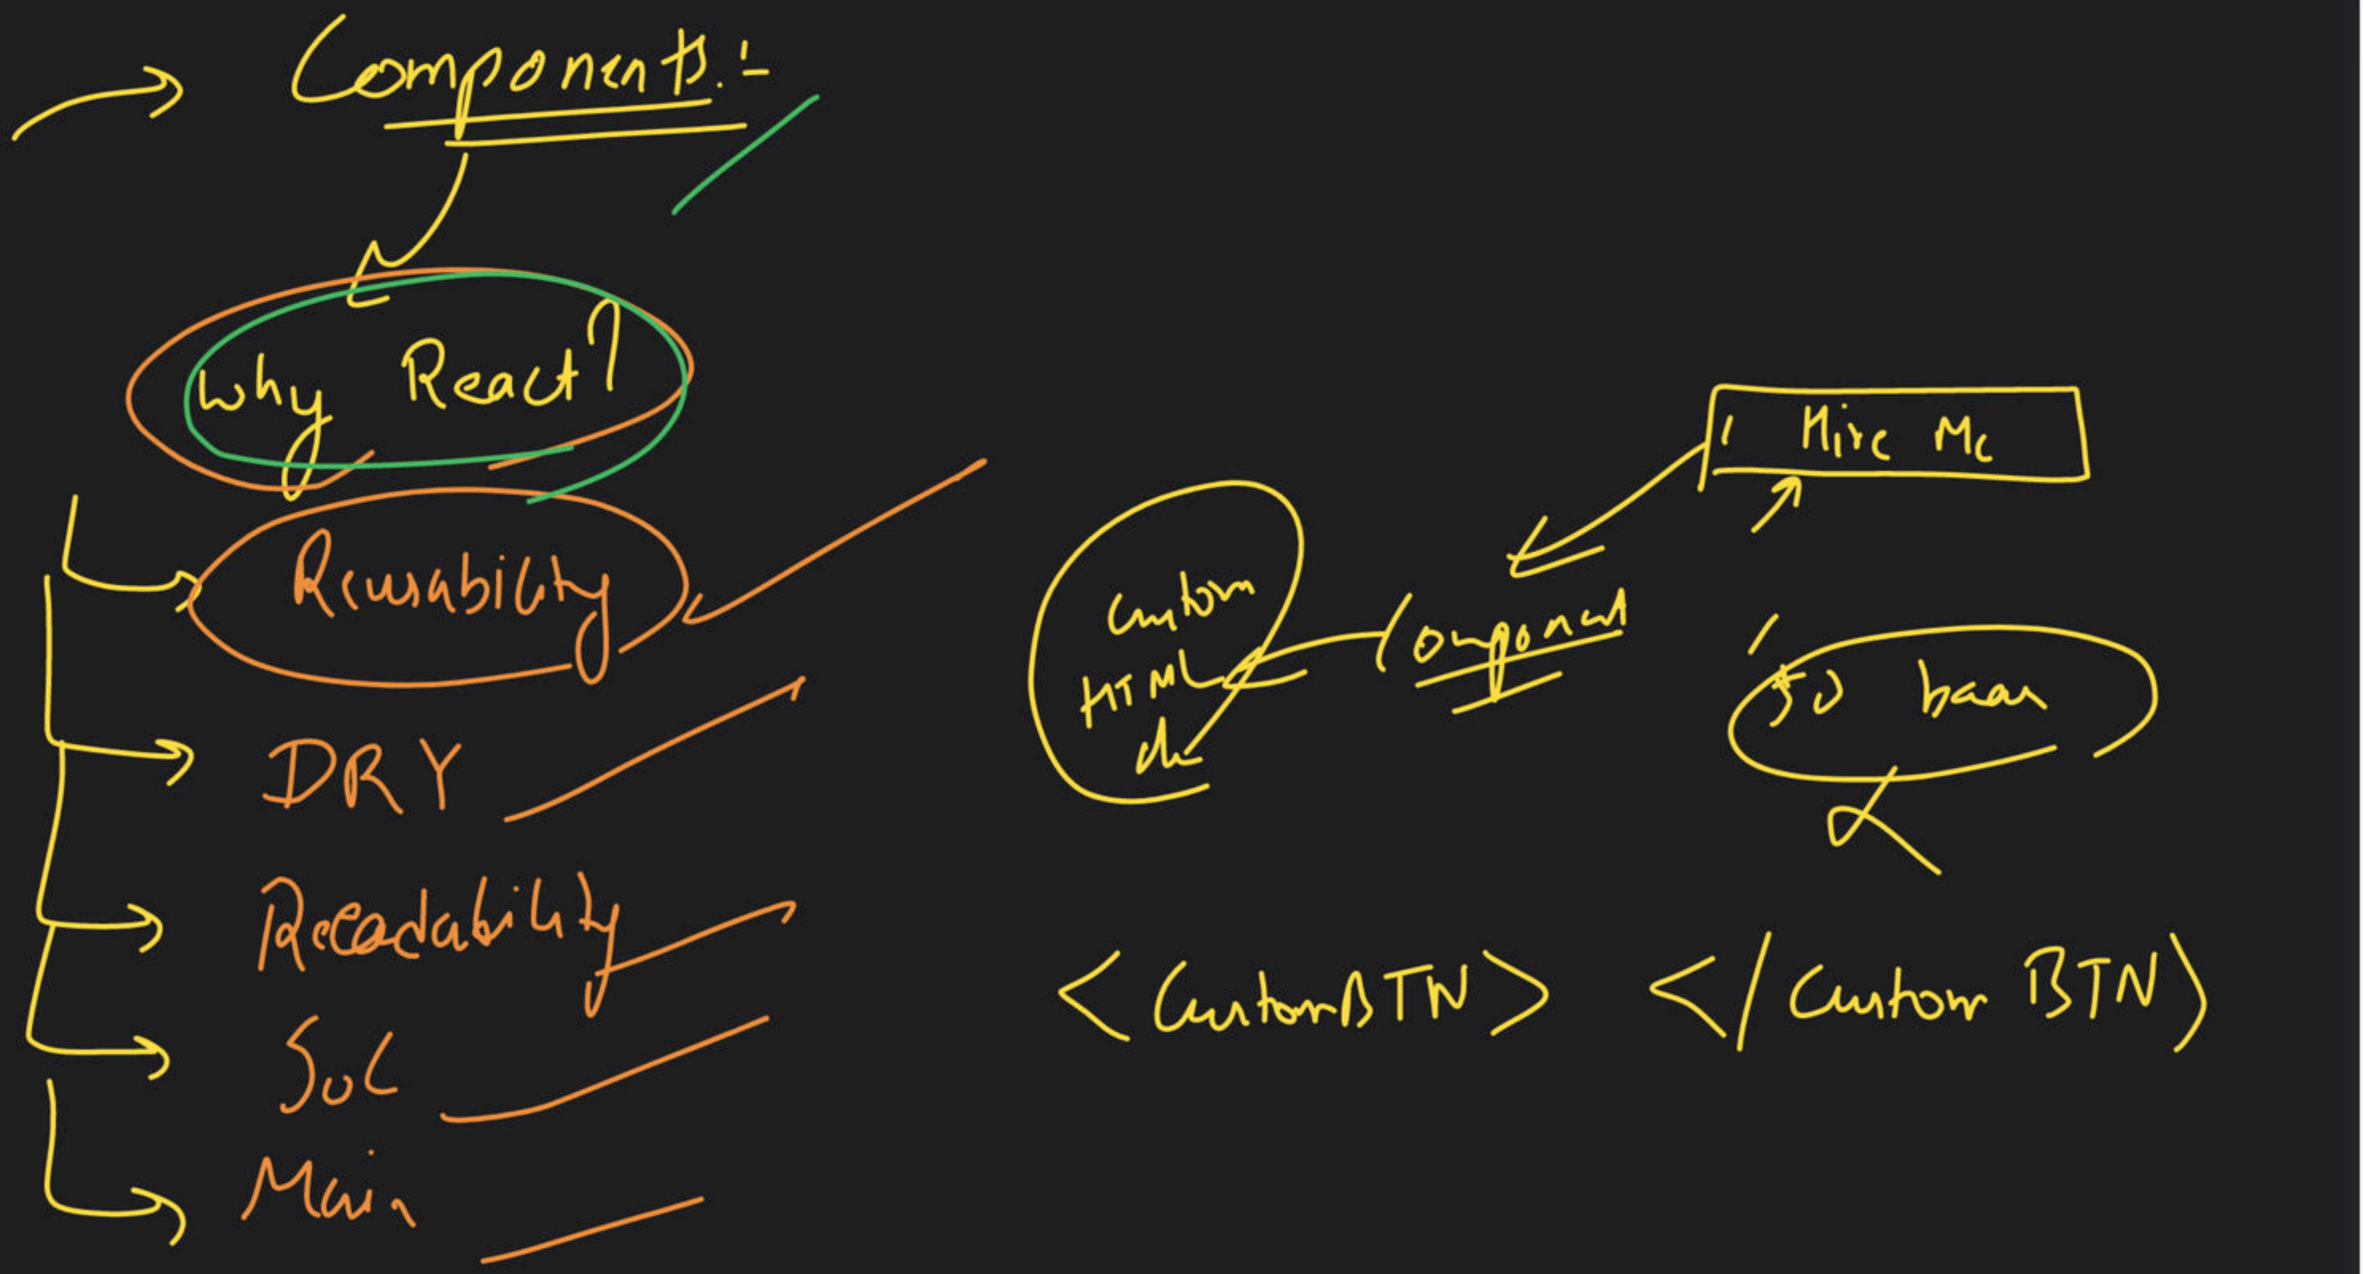
React Alternatives

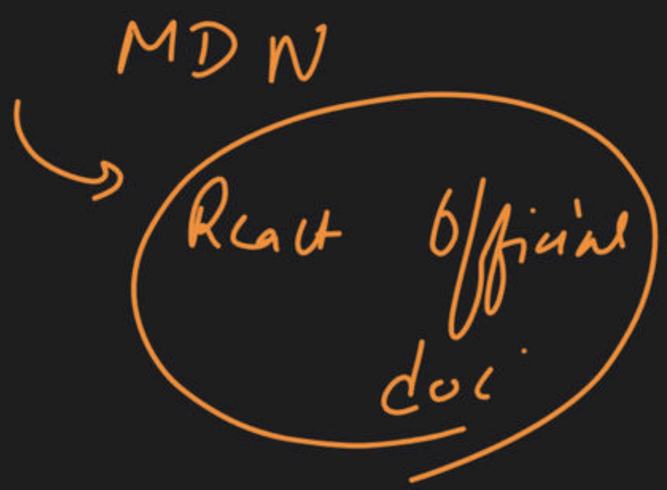


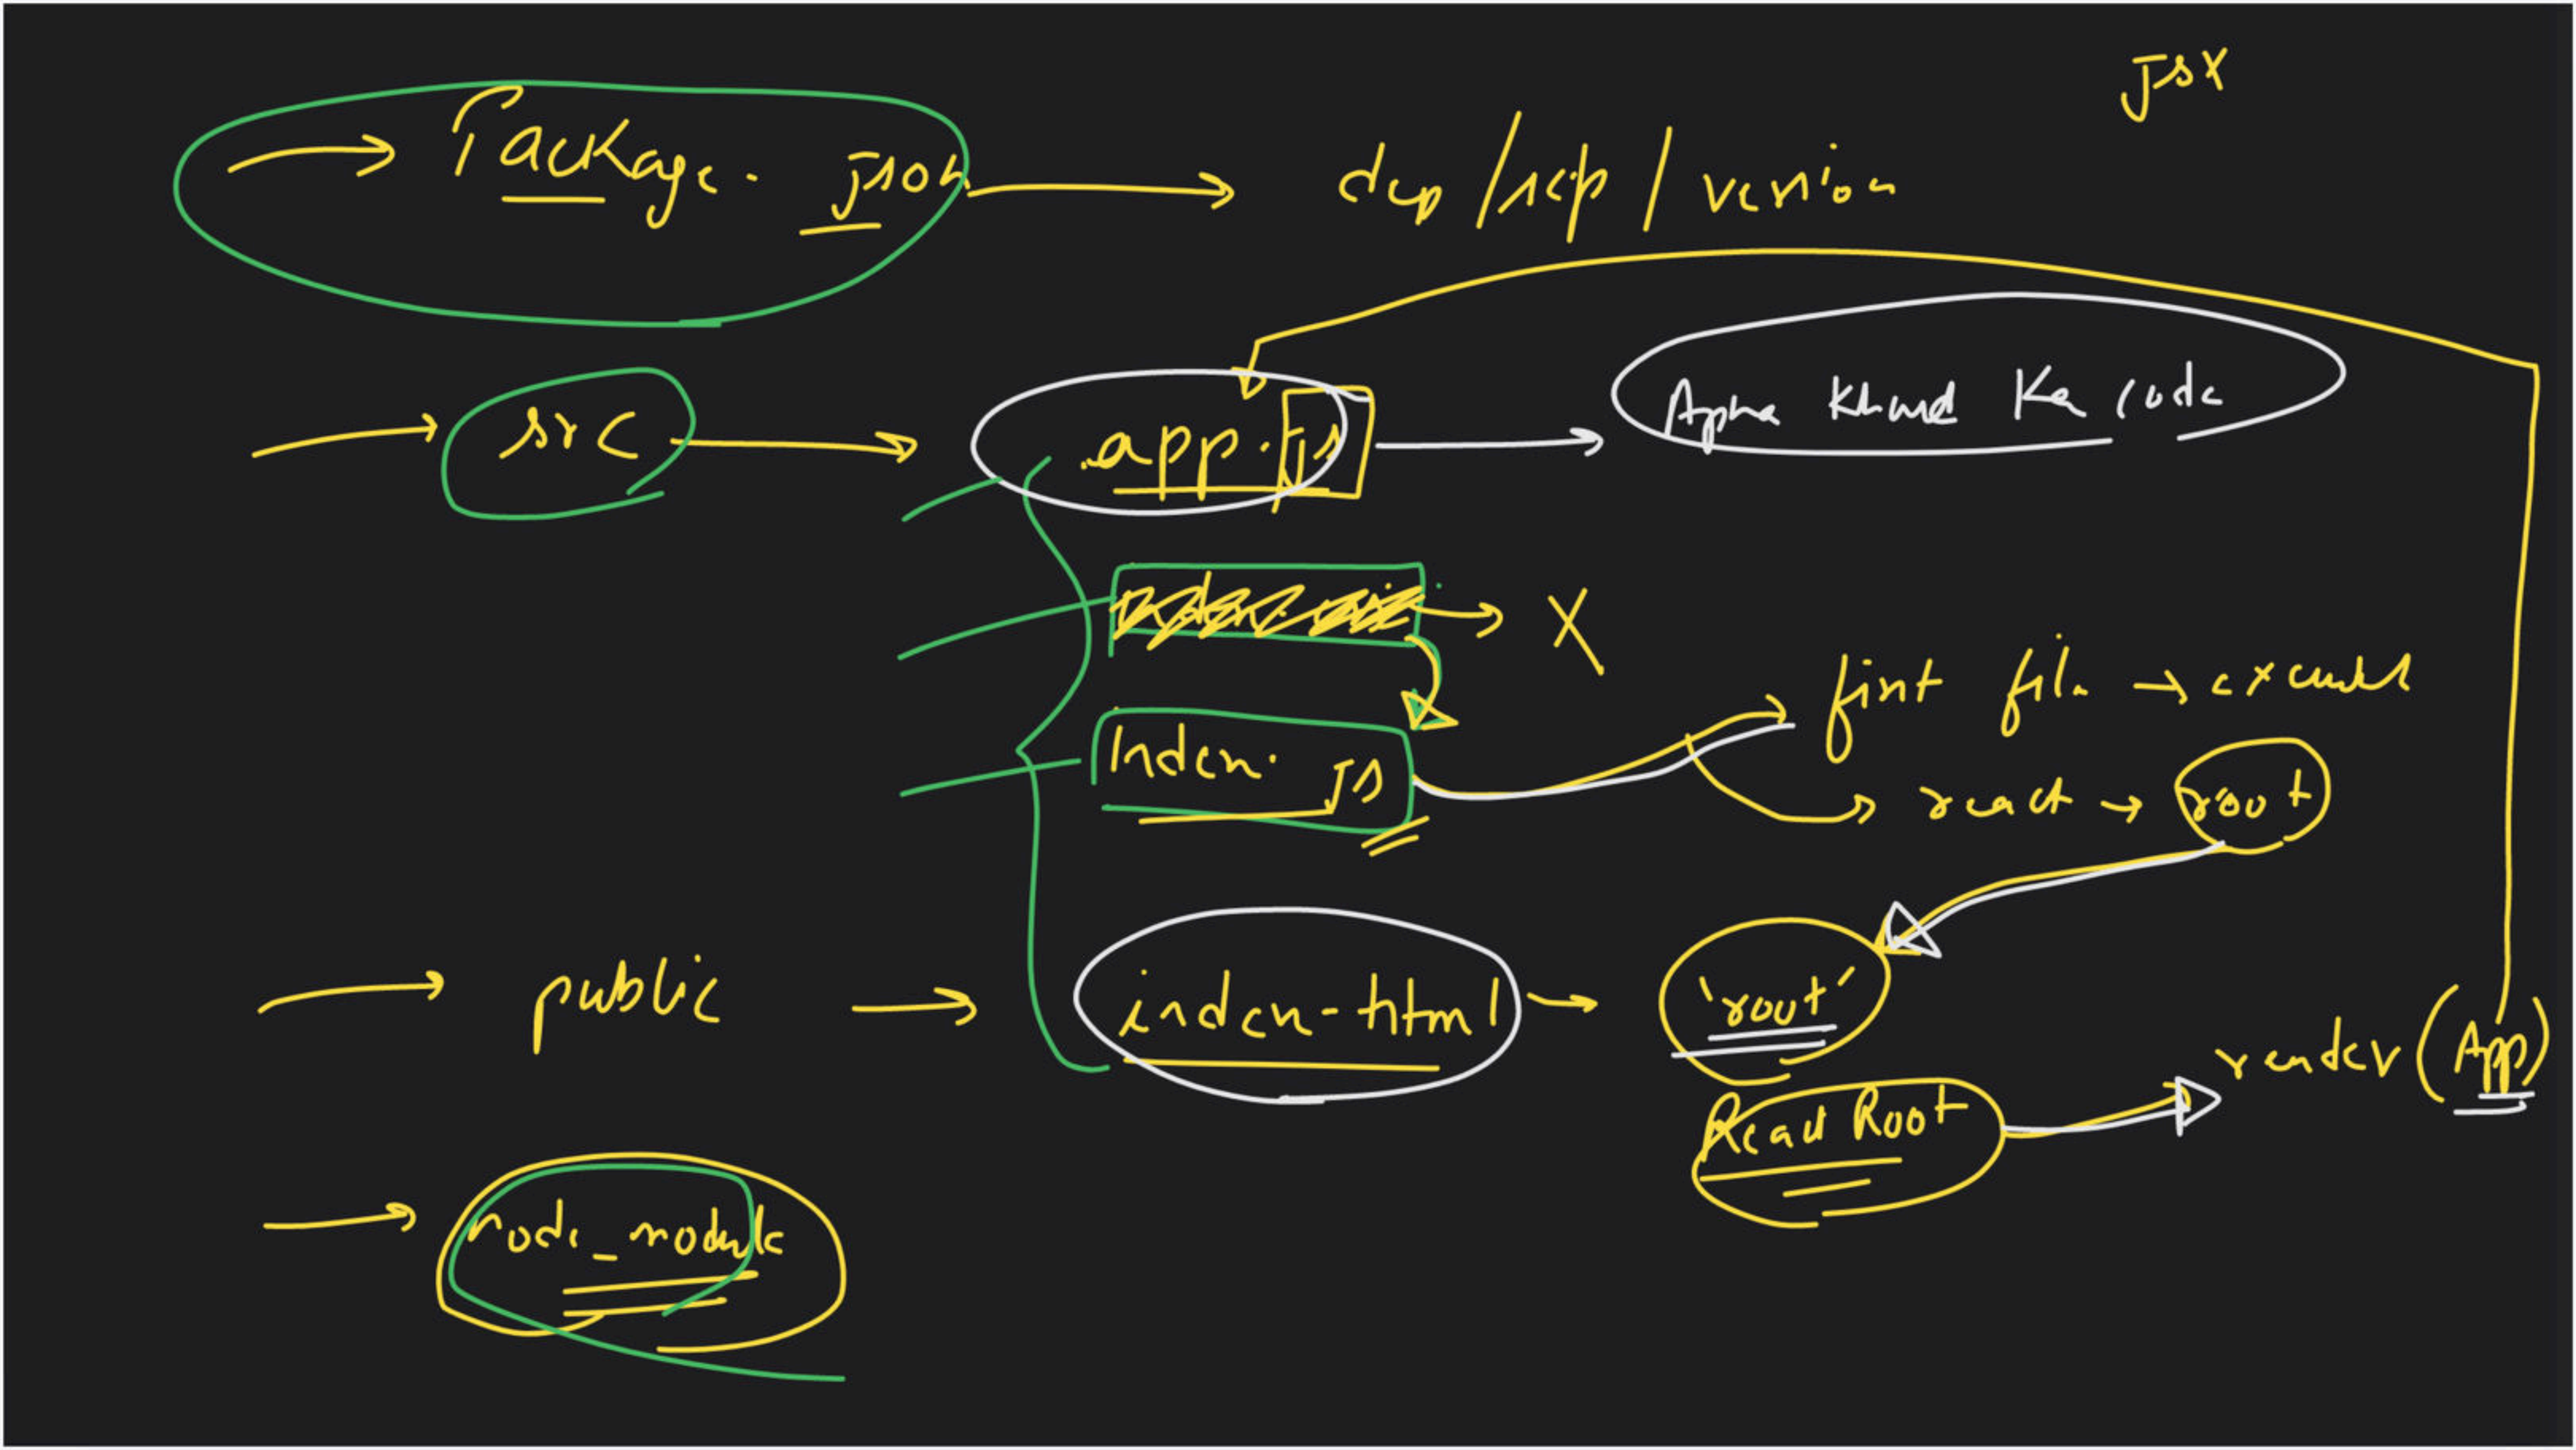
- Core Syntax & Setup & JSX
- Component
- data



Components :-
Why React?
Reusability
DRY
Readability
SoC
Main
Mic Mc
Custom HTML
Component
JS baar
<CustomBTN>
</CustomBTN>

Setup:-





JSX
package.json
dep / scp / version
src
app.js
Apna khud ka code
X
first file → execute
react → root
index.js
public
index.html
'root'
render(App)
React Root
node_modules

App ()

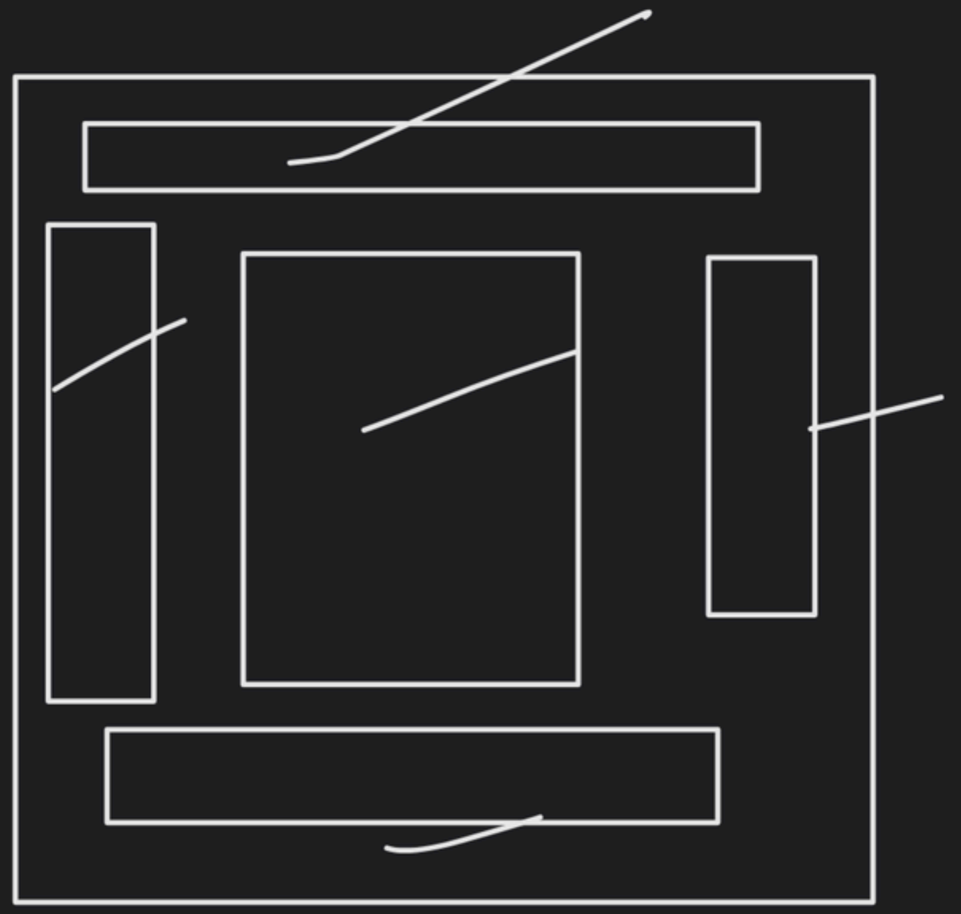
{

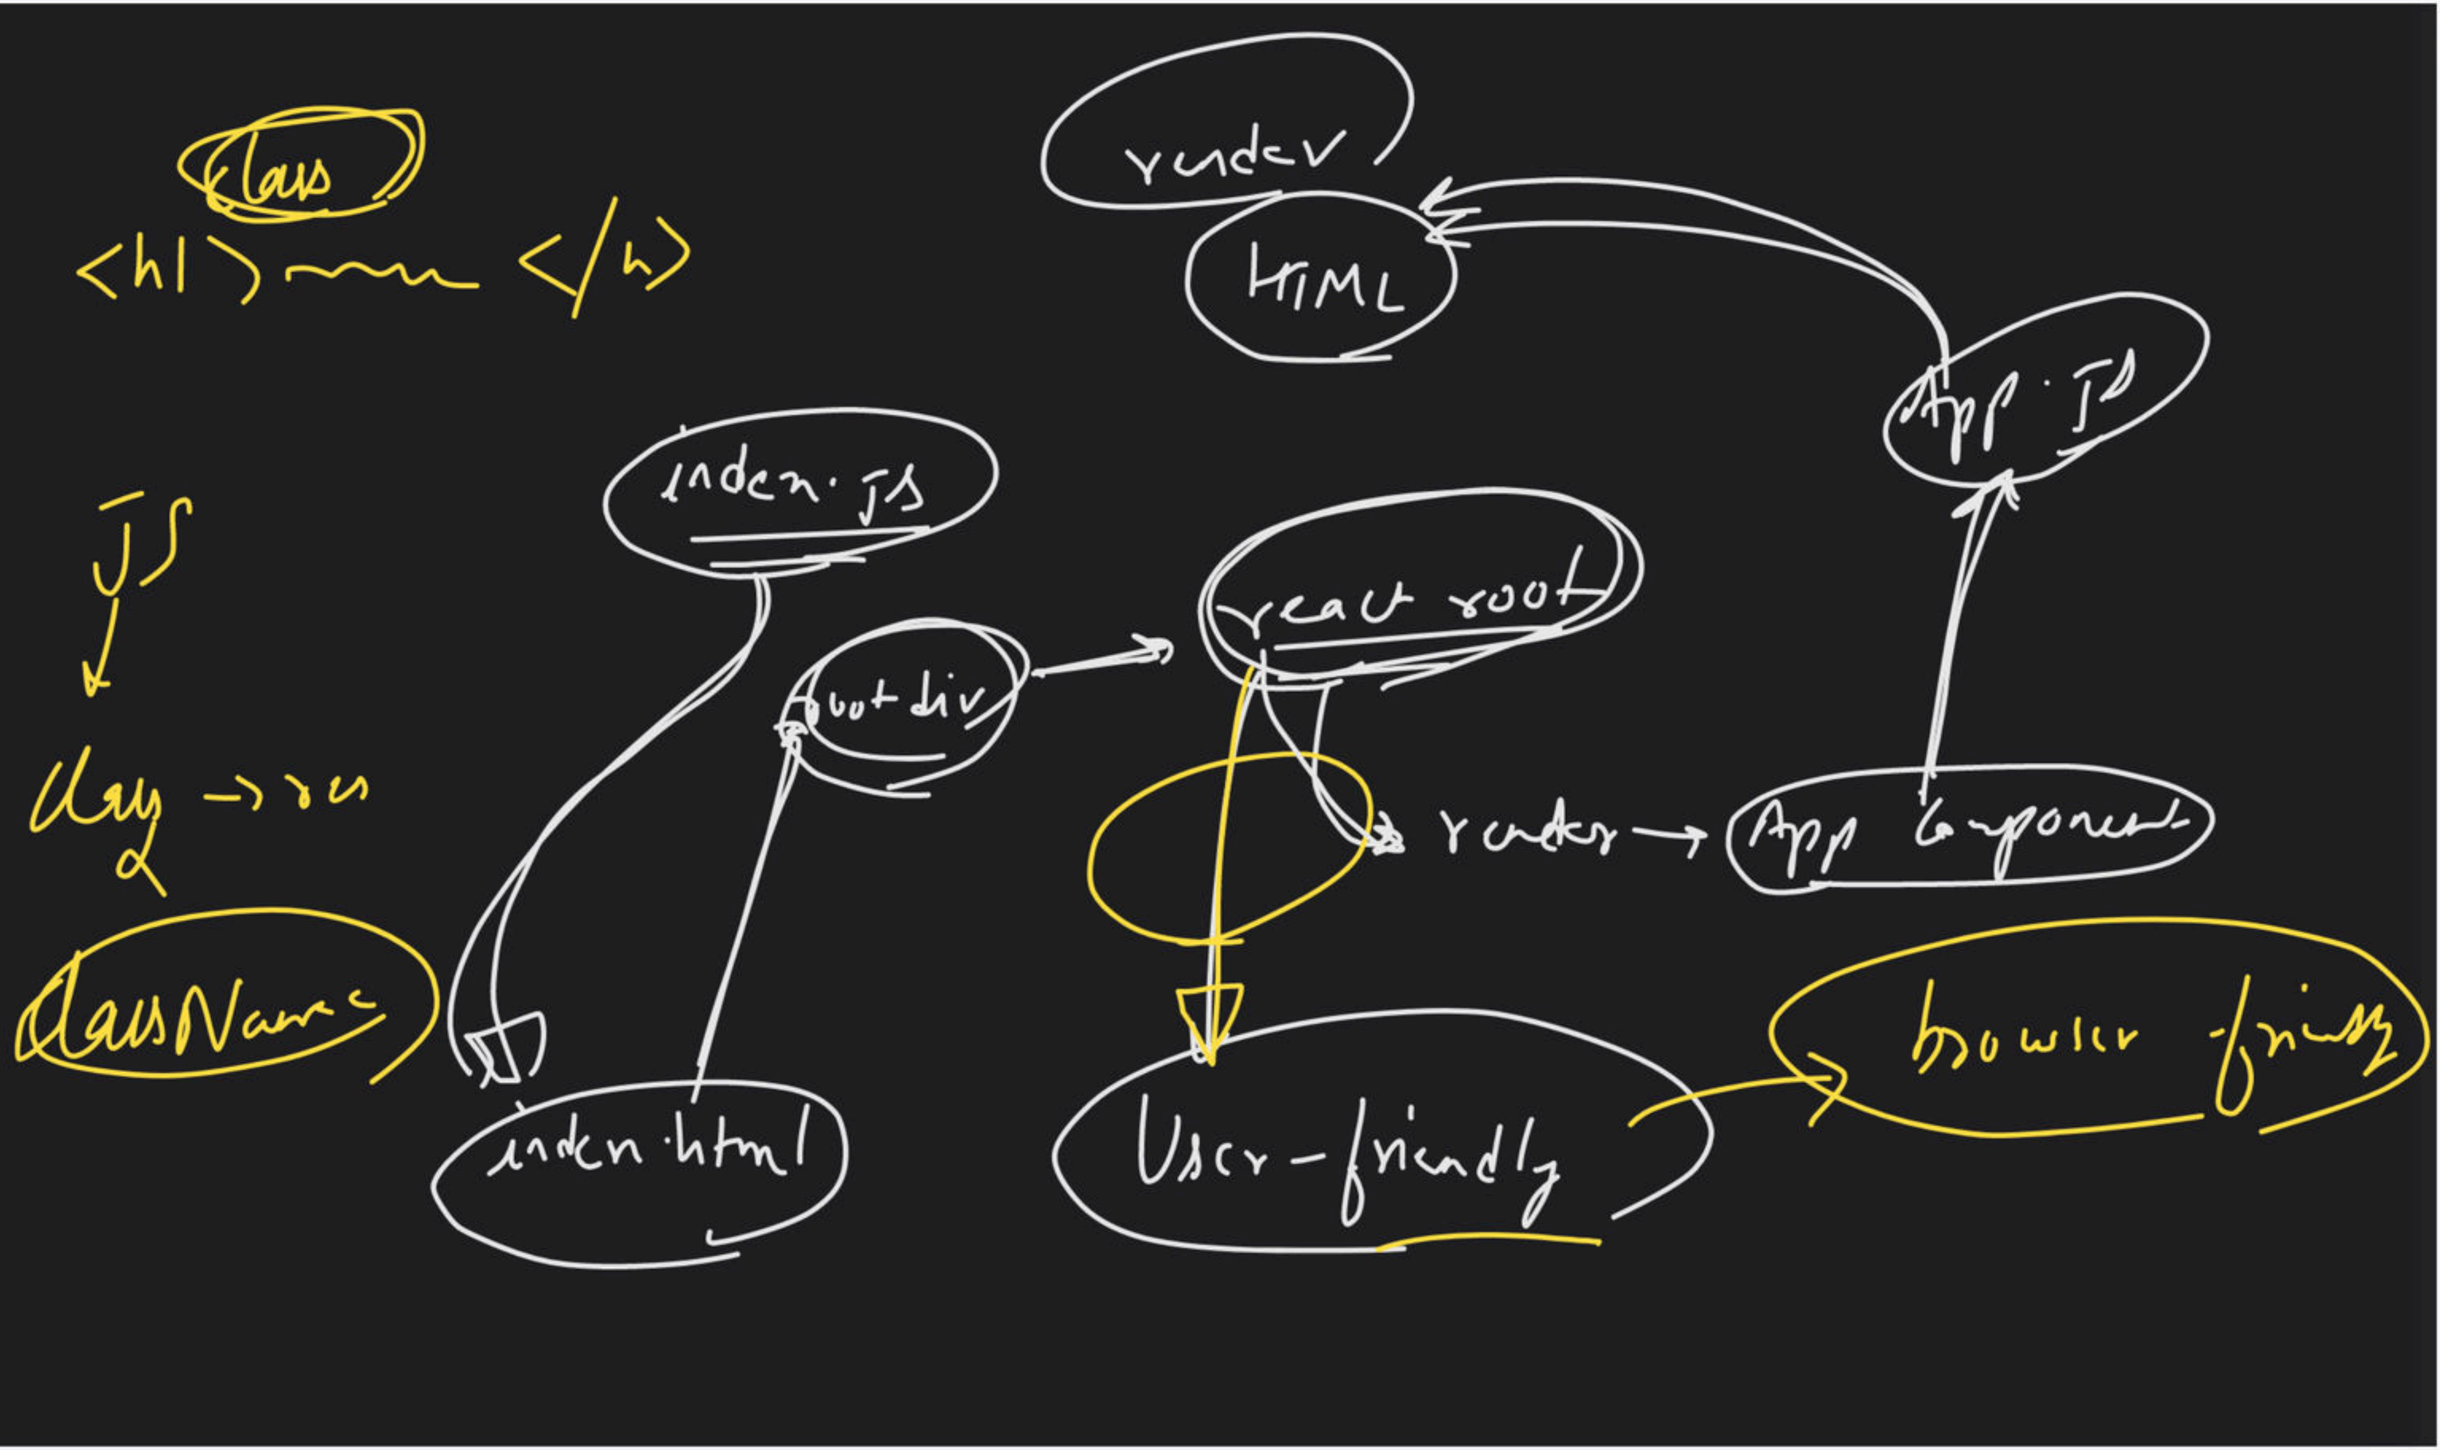
return (

HTML

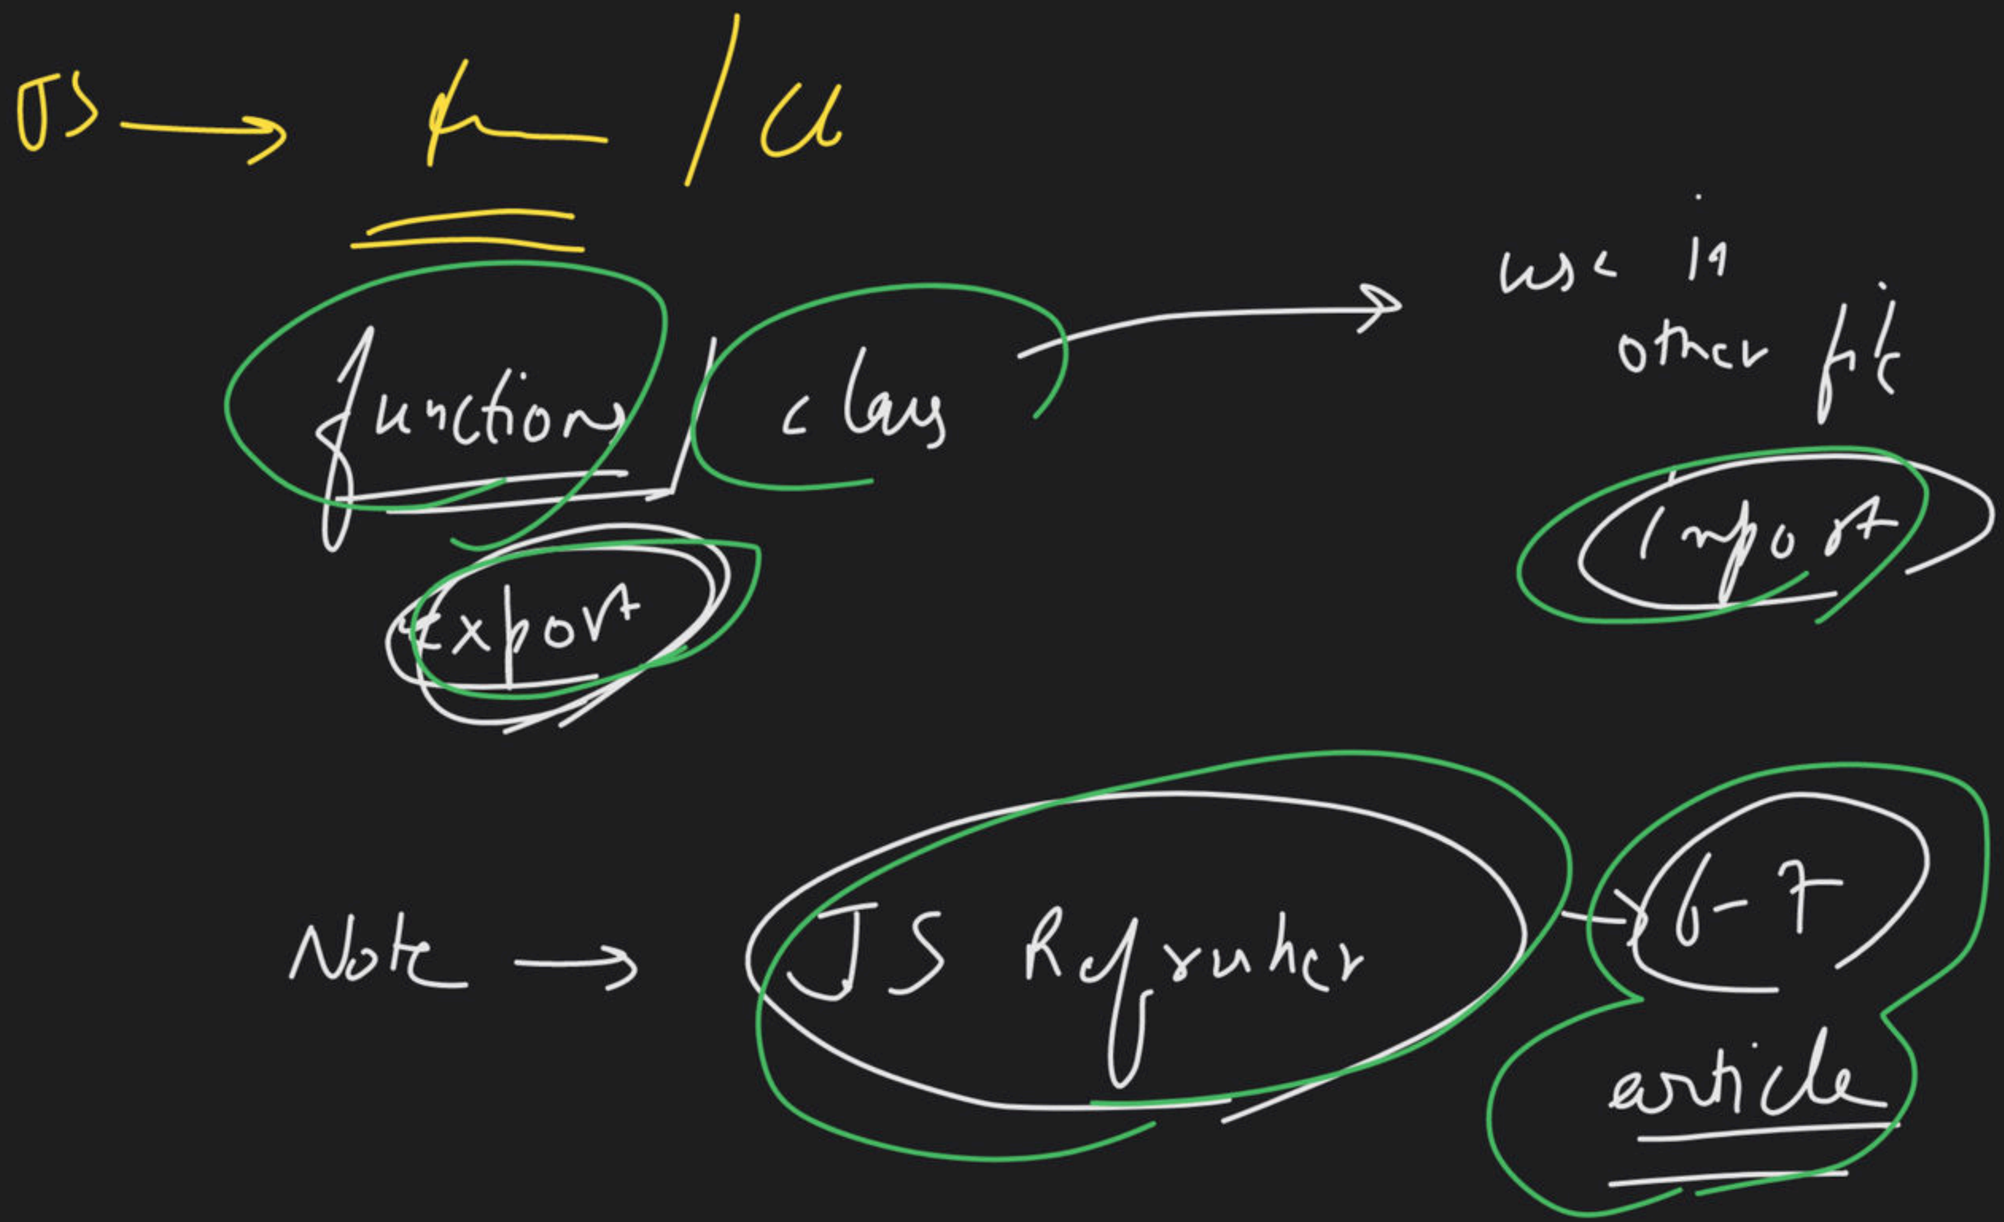
);

}

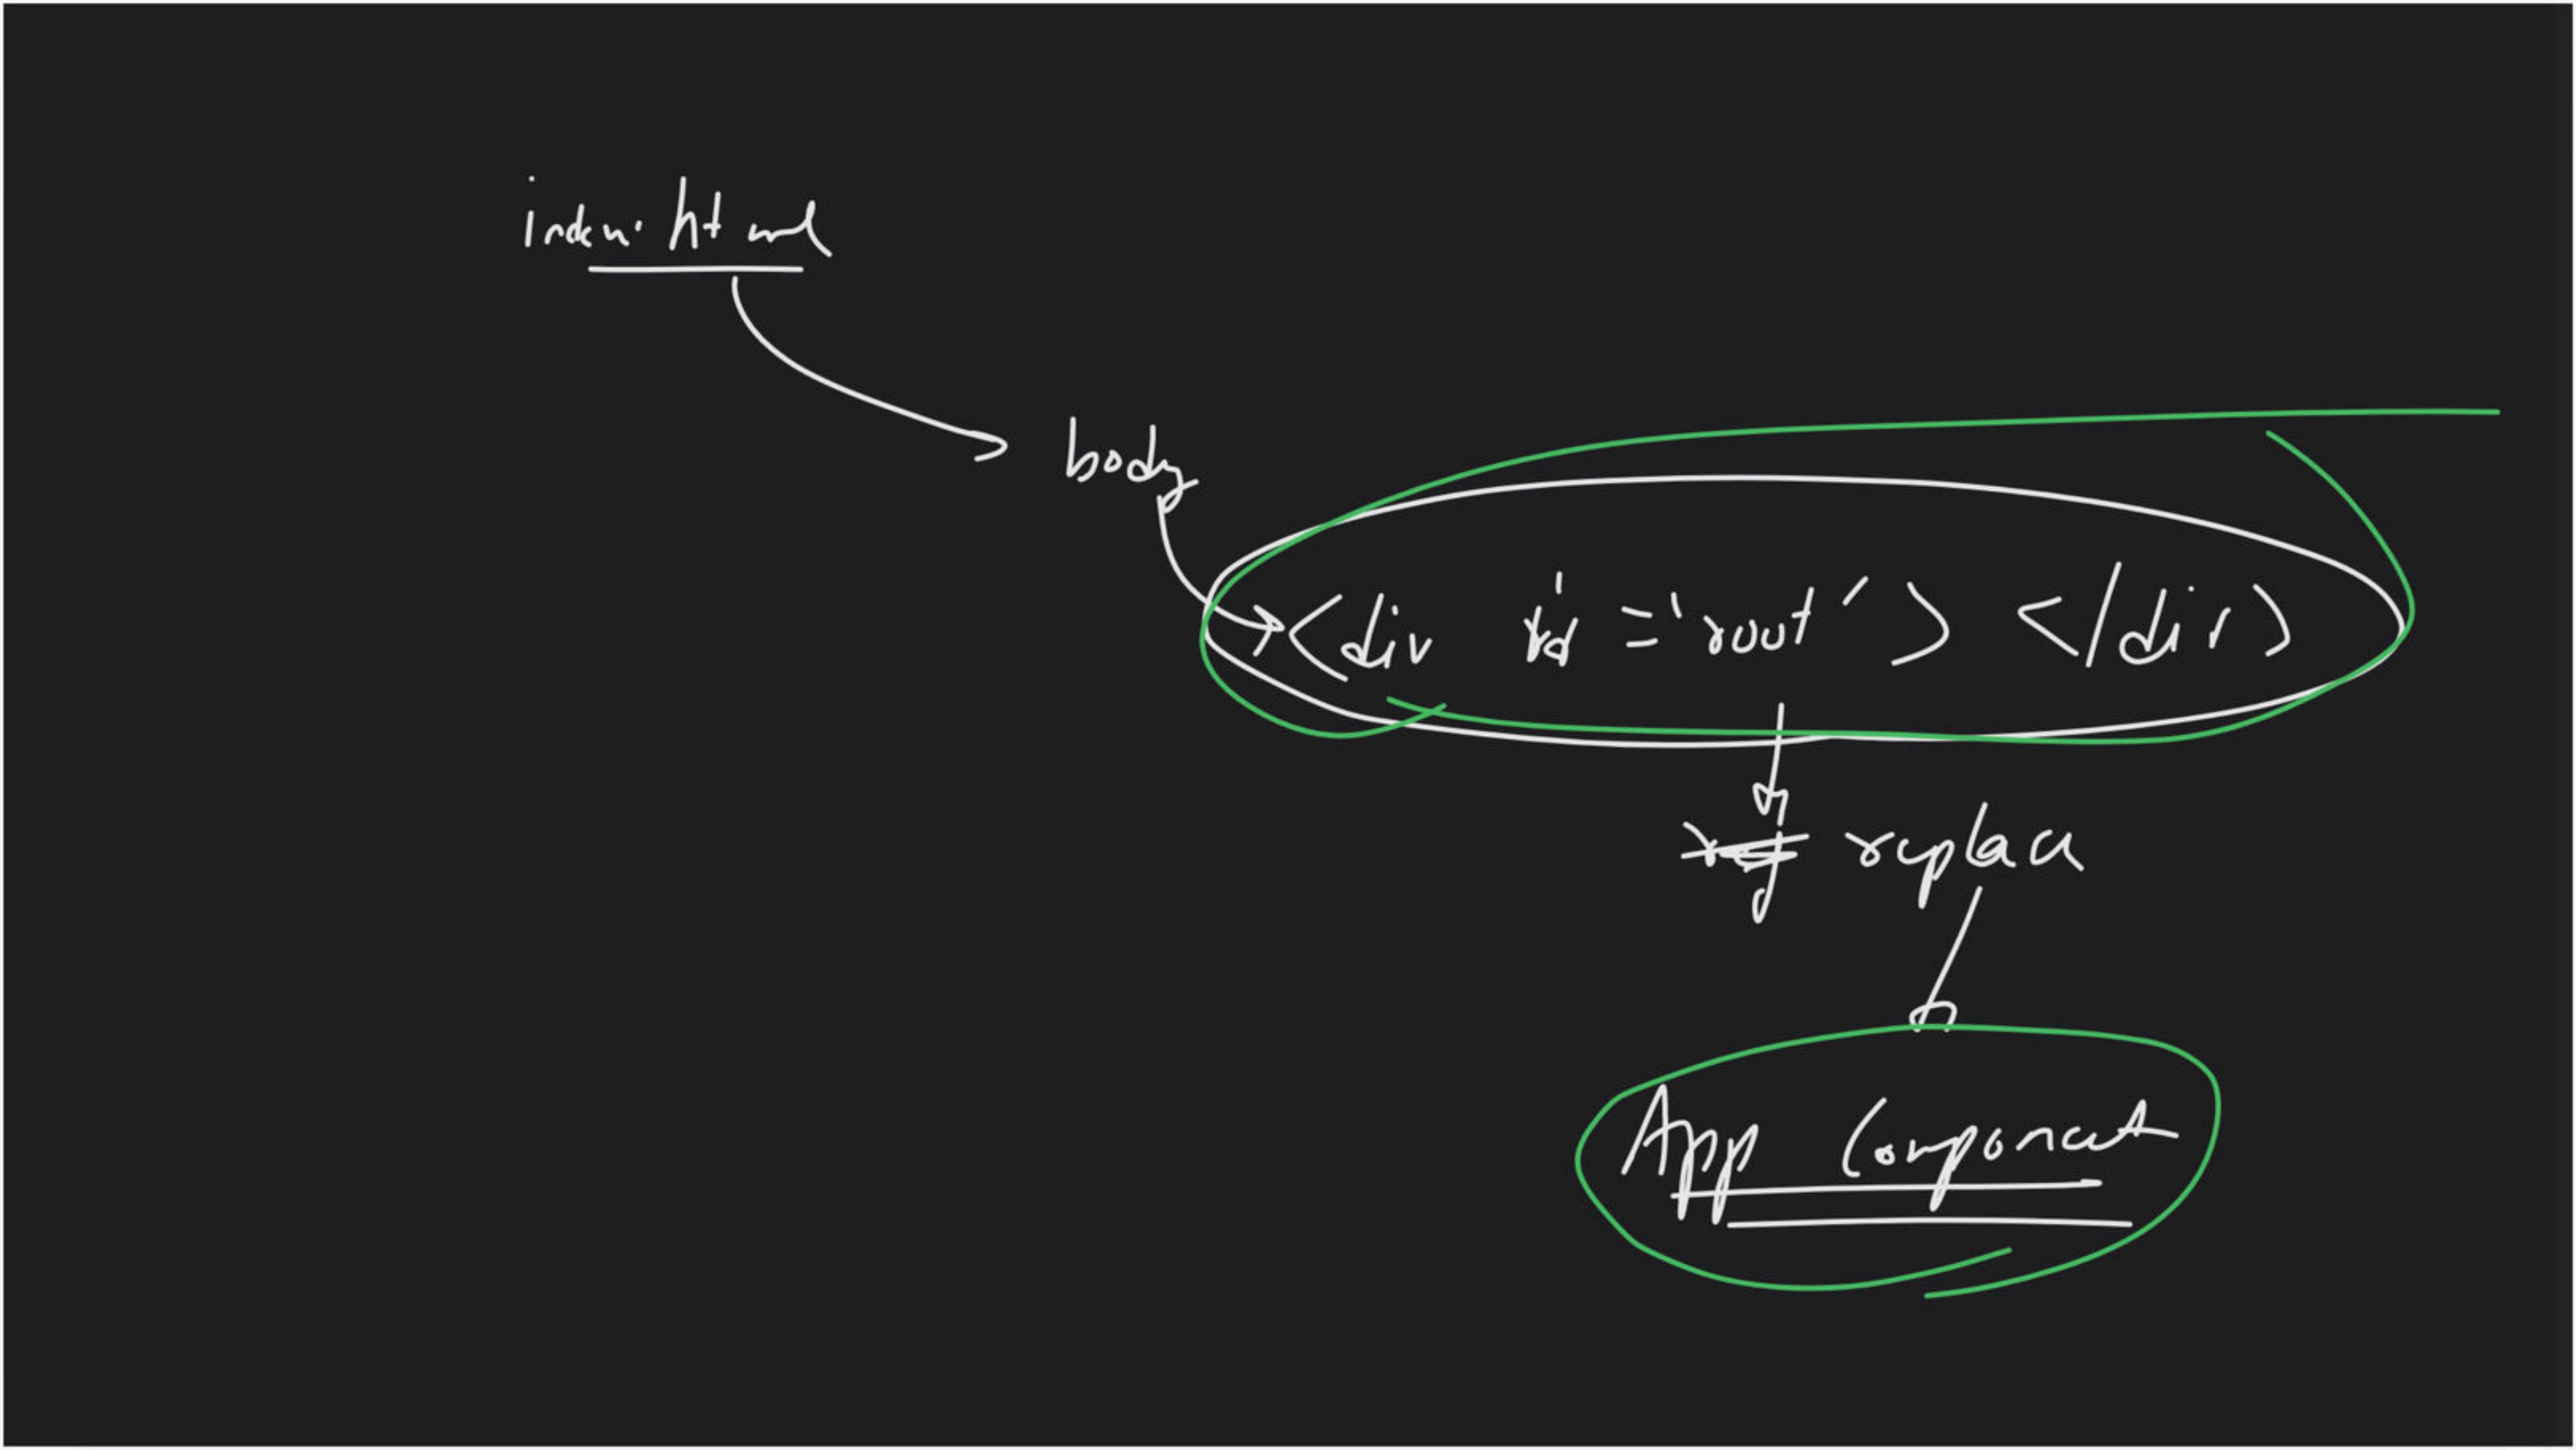




class
<h1> </h1>
render
HTML
App.JS
index.JS
root div
react root
render → App Component
JS
Key → res
className
index.html
User-friendly
browser-friendly

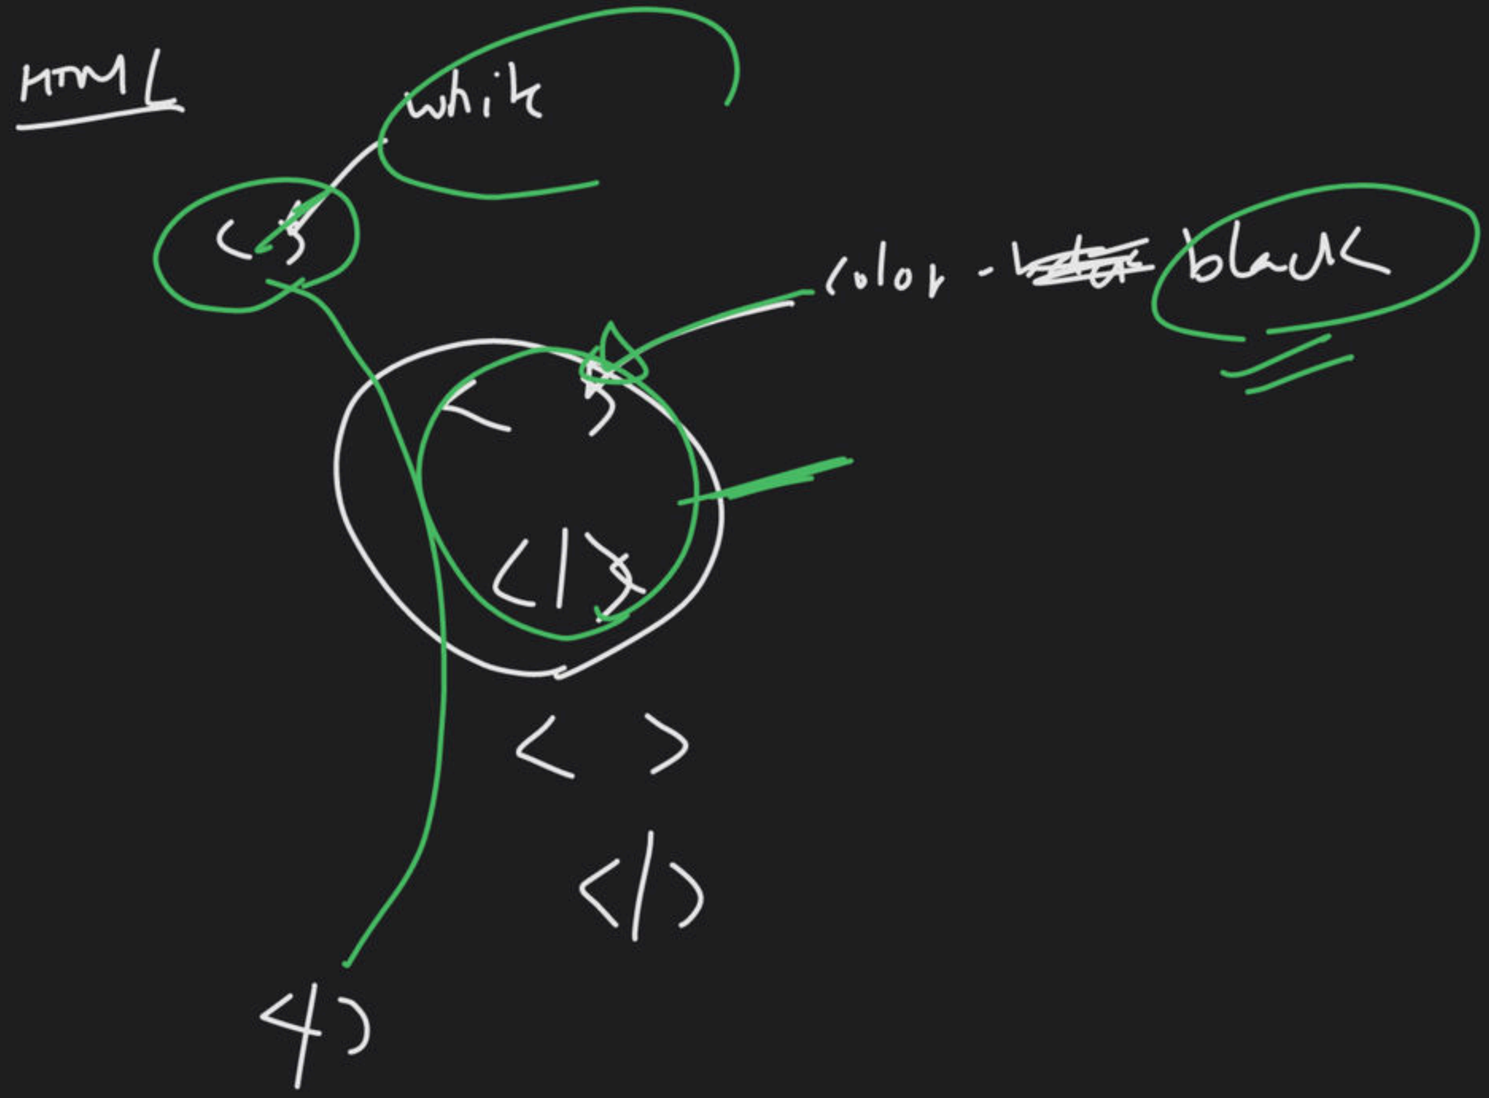


JS → fn / cl
function
class
export
use in other file
import
Note →
JS Refresher
6-7
article

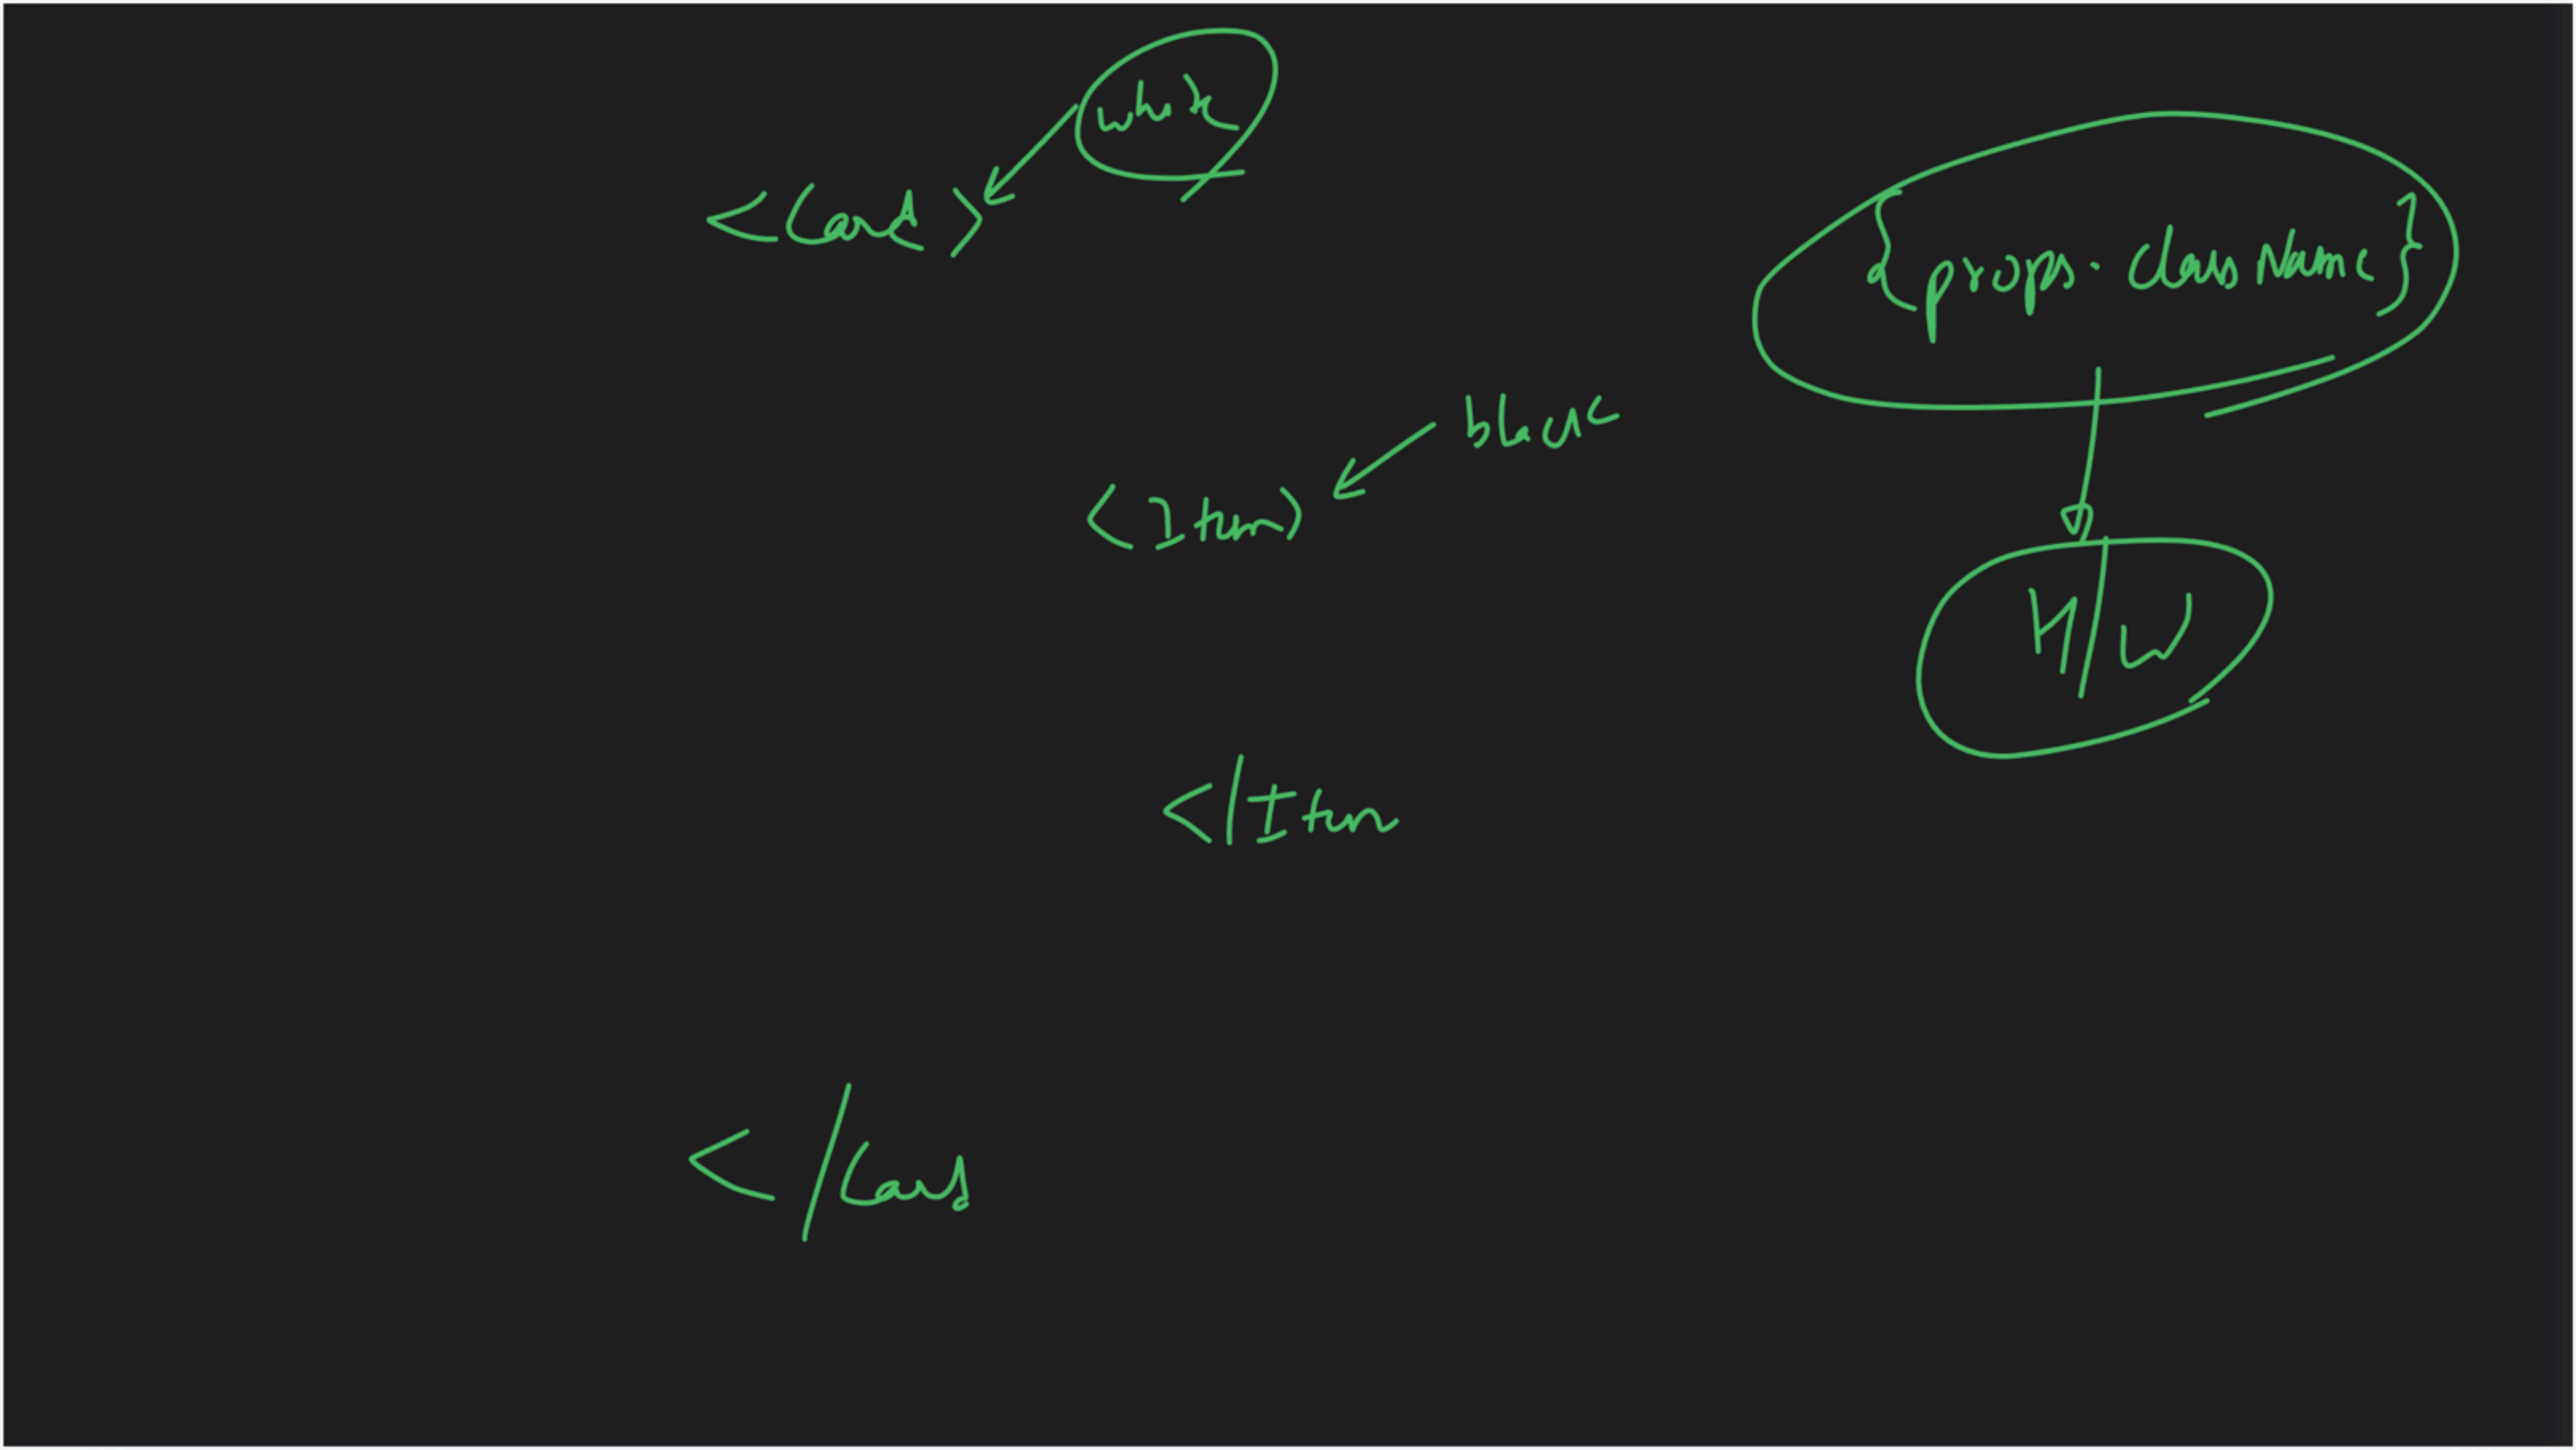


index.html
body

replace
App Component



HTML
white
color - black



white
<Card>
black
<Item>
{props.className}
H/W
</Item>
</Card>
